Fax : + 33 3 25 40 36 45
Technical informations and video should be loaded from web site www.princecastle.com
- **10. Custom documents** : for shipments out of CE countries = 60 € will be added per invoice for custom documentation.
- **11. Warrantly policy** : 1 year part & labor warranty

SLICERS AND CUTTERS

Tomato Saber

PERMA-TIGHT™ BLADE CARTRIDGE
THE TOMATO SABER'S EXCLUSIVE PERMA-TIGHT BLADE CARTRIDGE CONTAINS PRE-TENSIONED STAINLESS STEEL BLADES THAT NEVER NEED ADJUSTMENT OR TIGHTENING. THIS UNIQUE DESIGN RESULTS IN UP TO 50% LONGER BLADE LIFE AND PROVIDES SNAP-OUT/SNAP-IN, QUICK CHANGE REPLACEMENT.
NOT DISHWASHER SAFE. CLEAN CAREFULLY UNDER WATER AFTER EACH USE. REFER YOURSELF TO CLEANING PROCEDURE

PUSHER HANDLE
ERGONOMICALLY DESIGNED FOR COMFORT, THIS HANDLE DIRECTS THE OPERATOR'S FORCE ALONG THE CENTRE OF THE TOMATO FOR A SMOOTH, EASY STROKE.

TOMATO PUSHER
DOUBLE CONTOURED TO SECURELY HOLD AND GUIDE THE TOMATO THROUGH THE BLADE CARTRIDGE, THE TOMATO PUSHER FEATURES RIGID ALUMINIUM FINGERS SUPPORTED BY FULL LENGTH PLASTIC SPACERS.

CAST ALUMINIUM BASE
COMMERCIAL-GRADE CASTING INCLUDES THE BEST COMBINATION OF STRENGTH, WEIGHT AND CORROSION-RESISTANCE TO PROVIDE STABILITY WHILE SLICING.

BRIDGE AND HANDLE ASSEMBLY
THE ONE-WAY BLADE INSERTION TRACK POSITIONS THE PERMA-TIGHT BLADE CARTRIDGE AT THE OPTIMAL ANGLE FOR SLICING. A BUILT-IN HANDLE AND EXTRA-WIDE BLADE GUARD PROVIDE ADDED SAFETY AND STABILITY.

TOMATO CATCHER
THIS INNOVATIVE ATTACHMENT MADE OF DURABLE, HIGH-IMPACT PLASTIC PROVIDES A LANDING PAD FOR THE SLICED TOMATO. USING THE CATCHER RESULTS IN REDUCED CLEAN-UP TIME AND ASSURES FOOD DOES NOT COME IN CONTACT WITH CONTAMINATED SURFACES.

840-T4CE	4-Channel Multi-Function Timer	1203,00 €

TOASTERS

Radiant toasting

- Method of toasting bread product using infrared radiant heat to remove moisture and dry the bread out, thereby producing a crunchy, traditional-style toast.

Contact toasting

- Method of toasting bread product by direct contact with a heated surface. Also known as “bread grilling”, this process caramelizes sugars on the open face of the bun.

Benefits of contact toasting

- Quickly produces hot toasted breads
- Improves product taste and appearance
- Precision time and temperature controls provide consistent results
- Increases operator safety
- Improves kitchen operations with clean simple and reliable designs
- Produces warm, caramelized toast without drying out the bread. Bread is hot and moist with a “fresh out of the oven” presentation
- Caramelization toasts only the surface of the bread, forming a coating that protects the bread from the juices and condiments that can cause soggy, unattractive bread when not caramelized
- Consistent bun-to-bun grilling eliminates flavor transfer and uneven toasting commonly found with manual toasting on griddles, hotplates and grills

VERTICAL TOASTER 297 series

- Delivers higher toasting capacities while maintaining proven reliable design.
- 12-, 20-, and 40- second toasting models are available.
- Stronger motor and higher temperature platen increases performance.
- Easy to clean and maintain.
- Adjustable bun crush controls and thermostat allows for precise toasting for various bread products.
- Compact design requires only 8" (20.3 cm) of counter space depth.
- 12- second toasting models available with passive heat source for increasing internal bun temperature.

297

Model No.	Description	Buns/Hr	Electrical Requirements	Plug Configuration	Dimensions (mm)	List Price

Contact grills

Prince Castle contact grills are available in single or dual lid configurations with smooth or grooved surface options. Heavy duty in-cast platens offer independent control of both top and bottom surfaces, allowing for consistent grilling and heat penetration throughout the product.

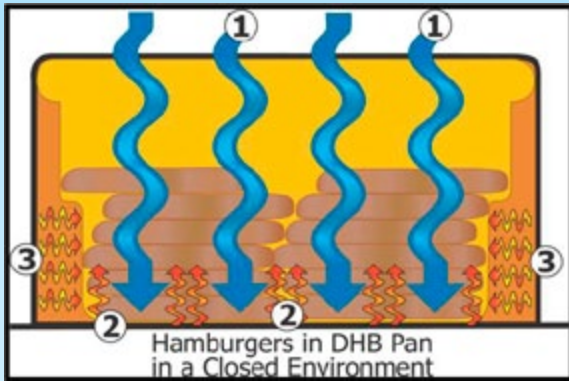

- Split top design allow efficient grilling of a wide variety of products including tortillas, sandwiches and chicken breasts.
- "Floating gap" design allows many products of varying thicknesses to be grilled.
- Solid state controls provide accurate temperature control.
- 35 cm cooking surface width.
- Cooking surface temperature range = 80°C to 300°C.
- Durable stainless steel construction with integrated four channel electronic, programmable timer/alarm (for each lid) to accurately track product grill times.
- Easy to clean - grease drawer is accessible from front.

DEDICATED HOLDING BINS

Efficiently Hold Foods Using 3 different heat types

- 1- Reli-A-Temp technology creates infrared energy that penetrates the food, maintaining proper internal food temperatures.
- 2- Conductive heat generated from the bottom heater is transferred to the food through direct contact with heaters.
- 3- Warm air bathes the outside surface of the pan, keeping the air within the pan warm by preventing hot air from escaping.

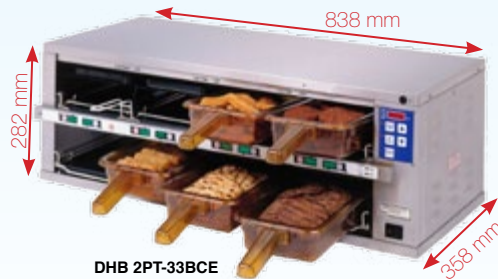

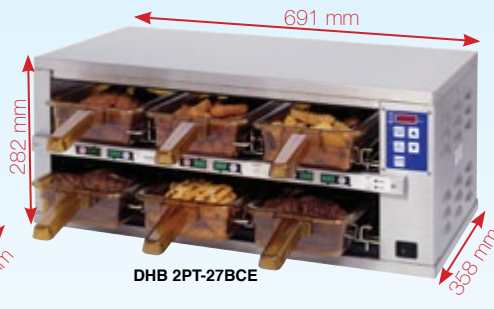

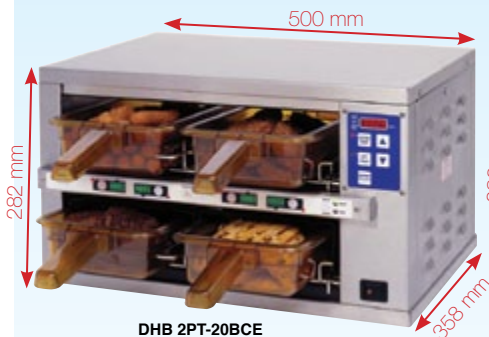

About Prince Castle's exclusive Reli-A-Temp Technology

- uses patented foil heater designs for reliable long life
- Works in a drawer; self-diagnostic controls
- No moving parts for increased reliability
- Cool equipment surface temperatures
- Solid state digital technology

UNDERSTANDING MODEL NUMBERS

DHB 2 PT - 20 BCE

- ↙ Dedicated Holding Bin
- ↖ Indicates Number Of Shelves (2)
- ↗ PT Indicates "Pass-Thru" Design
- ↘ Width Of Unit In Inches (20)
- ↙ European model

- Consistent product holding temperatures with extended holding time capacity
- Equipped with Menu trak food Supervision System, which identifies where menu items are located and tracks their respective hold times.
- Pass-thru design allows operator to access product from the front and back of the bin
- New rack system simplifies cleaning
- Compact design allows bin to fit anywhere
- Includes removable pan covers, allowing users to hold both fried and non-fried foods.

EXCLUSIVE MENU TRAK FOOD SUPERVISION SYSTEM

- Supervises your food holding
- Identifies location of product and tracks holding time
- Indicates when you should use, discard or cook more product
- Alphanumeric display is easy to read item descriptions
